PROFESSIONAL SUMMARY

Junior DevOps & Cloud Engineer (MS IT, BS Electronics Engineering) who has built and shipped 3 end-to-end AWS projects: an EKS GitOps platform (Terraform, Argo CD, Helm), a keyless OIDC Terraform pipeline, and an ECS Fargate CI/CD deployment with automated rollback. Enforces security in CI with Trivy and custom Python policy checks; monitors with Prometheus, Grafana, and CloudWatch. Brings 3 years of operations experience in vendor coordination, record accuracy, and root-cause analysis.

TECHNICAL SKILLS

Cloud / AWS: EC2, VPC, IAM, S3, EKS, ECS Fargate, ECR, ALB, CloudWatch, Security Groups

IaC: Terraform, HCL, Modules, S3 Remote State, DynamoDB State Locking

CI/CD & GitOps: GitHub Actions (Workflows, OIDC), Argo CD (App-of-Apps), GitFlow, Docker Buildx

Containers & Kubernetes: Docker, Docker Compose, Kubernetes, Helm 3, NGINX Ingress, HPA

Monitoring & Security: Prometheus, Grafana, Alertmanager, ServiceMonitors, Trivy, Snyc

Linux & Scripting: Ubuntu Linux, Bash, Python, SSH, Networking

PROJECTS

AWS EKS GitOps Platform

github.com/baqir-ops/aws-eks-gitops-platform

AWS EKS, Terraform, Argo CD, Helm, GitHub Actions, Python, Trivy, kube-prometheus-stack

- Architected a 3-environment (dev, staging, production) GitOps platform on EKS using Terraform, Argo CD App-of-Apps, and Helm.
- Engineered 3 GitHub Actions pipelines (GitOps validation, Terraform CI, app CI) with manifest checks, Terraform linting, Buildx caching, and Trivy gates.
- Enforced 3 policy rules via Python scripts in CI: no plaintext Secret manifests, no wildcard chart revisions, immutable sha-* image tags only.
- Implemented observability with kube-prometheus-stack: ServiceMonitors, Alertmanager rules, and Grafana dashboards.

Terraform AWS Infrastructure & Security Pipeline

github.com/baqir-ops/terraform-aws-infrastructure-lab

Terraform, AWS (VPC, EC2, IAM, S3, ALB), GitHub Actions, Trivy, OIDC

- Built modular Terraform for 5 AWS services (VPC, EC2, IAM, S3, ALB) with least-privilege security groups and IAM.
- Eliminated long-lived AWS access keys by moving GitHub Actions to IAM OIDC roles (0 stored credentials).
- Blocked misconfigured Terraform and vulnerable images before registry push by adding Trivy scans to the pipeline.

Serverless Container Deployment on ECS Fargate

github.com/baqir-ops/aws-ecs-flask-cicd

AWS ECS Fargate, ECR, ALB, CloudWatch, GitHub Actions, Docker

- Automated build, SHA-tag, and push to ECR with GitHub Actions; deployed to Fargate behind an ALB with zero-downtime rolling updates.
- Resolved 3 failure types (ALB 503s, target group health check failures, circuit-breaker rollbacks) using CloudWatch logs and ECS events.

EXPERIENCE

Cloud & DevOps Engineer (Independent Projects & Labs)

2024 – Present

Self-Directed, Remote

- Provisioned AWS infrastructure with modular Terraform, with remote state in S3 and DynamoDB locking to prevent concurrent applies.
- Delivered GitOps releases with Argo CD and GitHub Actions (OIDC), gated by Python validation scripts and Trivy scans.
- Deployed containerized services on EKS and ECS Fargate using Helm, HPA, and NGINX Ingress; performed RCA on network, IAM, and pod failures.

Assistant Manager, Operations & Data Systems

2021 – 2024

Unicore Cables, Pakistan

- Maintained inventory and production-tracking records across manufacturing workflows for 3 years, keeping data consistent across departments.
- Resolved supply and inventory discrepancies through root-cause analysis; coordinated vendor deliveries with cross-team communication.

EDUCATION

MS Information Technology, Ghazi University, Dera Ghazi Khan

2018 – 2020

BSc Electronics Engineering, The Islamia University of Bahawalpur

2013 – 2017
